

About NetSmartz

NetSmartz® Workshop is an educational program that teaches children ages 5-17 about online safety and digital citizenship. NetSmartz offers free, age-appropriate resources including videos, games, e-books, webcomics, presentations, classroom lessons, and tip sheets to help children learn how to protect themselves and their friends online. Parents, educators, and law enforcement use these materials to engage children in discussions about online issues ranging from online privacy to cyberbullying. NetSmartz is a program of the National Center for Missing & Exploited Children®.

NetSmartzKids (ages 5-10)

NetSmartzKids introduces younger children to basic online safety and digital citizenship lessons using animated characters—Clicky, Tera, Nettie, and Webster. These resources teach children how to identify online dangers and practice safer behaviors through videos, music, games, and e-books. Visit NetSmartzKids.org for new contests and activities every month.

NSTeens (ages 8-12)

The NSTeens are a diverse cast of eight characters who help tweens learn about issues such as cyberbullying and online privacy. These resources simplify complicated Internet safety concepts for tweens who are becoming more involved with cell phones and social media sites. Resources such as animated videos, webcomics, games, and quizzes teach tweens how to protect themselves online and encourage them to be active members of their digital communities.

Real-Life Stories (ages 11-17)

Real-Life Stories materials challenge teens to think critically about online safety and digital citizenship issues, such as cyberbullying and sexting. These resources feature stories of teens that have experienced online victimization or digital drama firsthand. The narratives teach teens to recognize risky behaviors, evaluate their online choices, and communicate with trusted adults and friends. Teen materials include videos, discussion guides, tip sheets, and presentations.
